

CONCERT PLATFORM

Power precision medicine with a platform that supports genetic testing from end to end.

The Concert Platform integrates test selection, results retrieval and the insurance workflow in one intuitive system.

Every Lab, One Platform

- ✓ Order tests from more than 300 labs in a single user-friendly interface
- ✓ Reduce costs by steering orders to contracted labs
- ✓ Save time by digitally populating requisition forms
- ✓ Track and receive digital results

Lab	Periodic Fever Syndrome Panel Tests	MEFV Sequencing Tests
Invitae	\$1,800.00 10-21 days	\$1800.00 10-21 days
PreventionGenetics	\$1,290.00-\$1,440.00 28 days	\$910.00 18 days
Fulgent Genetics	\$1,450.00-\$1,950.00 21-35 days	\$1,050.00-\$1,150.00 21-35 days
ARUP Laboratories	\$3,200.00 70-84 days	\$950.00 14-21 days
CGC Genetics USA	Call for Price 60 days	Call for Price 60 days
DDC Clinic Laboratory	\$1,500.00-\$1,825.00 28 days	\$1,200.00 28 days
GeneDx	\$500.00-\$2,500.00 21-35 days	
MNG Laboratories	\$1,995.00 14-28 days	

Financial Stewardship

- ✓ Avoid surprises by viewing insurance coverage criteria on a test-specific basis
- ✓ Simplify prior authorization with tracking and support tools
- ✓ Minimize payment denials and unnecessary downstream re-work

Coverage Criteria
Product: Hemolytic-Breast Cancer Panel
Prior authorization **IS REQUIRED** for this test. Please follow the steps below to determine likelihood of authorization.
OPTIONAL:
 I already have authorization for this test.

For further definition of terms and/or clarification, view policy [Health](#).

1. Verify clinical criteria
2. Verify billing criteria: N/A
3. Verify documentation requirements

Prior Auth **IS REQUIRED** for this test.

Genetic Counseling
Has the patient received genetic counseling prior to testing and will they receive counseling after testing?

Yes No

1. Verify clinical criteria
N/A

2. Verify billing criteria: N/A

3. Verify documentation requirements

4. Verify documentation requirements

Trusted by thousands of genetics experts nationwide, the Concert Platform has a proven track record at leading hospitals and academic medical centers.

The Concert Platform brings continuity to genetic testing – from ordering and results to prior authorization and reimbursement – with valuable features that save time and money.

Key features include:

Search, Compare & Order

Clinicians search, compare and order tests from a database of the US genetic testing market – today more than 75,000 tests.

- Detailed comparisons of multi-gene panels support clinical decision making.
- Records of exact test orders (not just miscellaneous codes) on a patient- and provider-specific basis enable retrospective analysis.
- Pricing and test catalog data from labs across the market reveal opportunities to reduce testing costs.

Coverage & Prior Authorization

Health plan policies, coverage criteria and prior auth requirements are displayed on a test-specific basis.

- A policy intake process maps policy language to specific tests and coverage criteria.
- Prior authorization worklists enable the tracking of auths in-process and the storage of auth numbers (and denials) in a central location.

Laboratory Connectivity

Ordering clinicians see health plan laboratory networks and their institution's preferred laboratories, and they connect easily to the lab they select.

- The platform digitally populates requisition forms for more than 100 laboratories.
- Results return electronically and are stored in the platform.
- A single login to the platform replaces the time and effort otherwise spent on multiple lab portal logins.
